Reading part:

Read the following passage and answer the following:

#### THE SUSTAINABLE CITY OF MASDAR

Masdar City is a new city located in the United Arab Emirates. It was designed to be a model of sustainability. The goal of Masdar is to reduce

energy consumption and environmental impact while maintaining a modern and comfortable lifestyle for its residents. The city uses renewable energy sources such as solar power and wind energy to meet its energy needs. In fact, the city's buildings are powered entirely by .renewable energy

One of the key features of Masdar City is its transportation system. Instead of traditional cars, the city uses electric vehicles, which help reduce air pollution and traffic congestion. In addition, the city is designed with green spaces, like parks and gardens, that help improve .the air quality and provide places for relaxation and recreation

Masdar also focuses on water conservation. The city has a unique water recycling system that helps save water, which is a precious resource in the desert. The city's buildings are also designed to be energy-efficient, with insulation, solar panels, and advanced cooling systems that reduce .the need for air conditioning

Masdar City is still in development, but it has already become a symbol .of what a sustainable city could look like in the future

### **Short questions on the previous passage:**
